ABOUT ME

Beginning in January 2023, I began an intensive journey into backend development, focusing on mastering Laravel and expanding my understanding of server-side programming. Over the past year, I have developed skills in building robust web applications, integrating databases such as Oracle, and creating secure backend solutions.

I am passionate about enhancing functionality and user experience through well-structured backend systems and continuously strive to deepen my knowledge of modern web technologies. I am proficient in both collaborative and independent work environments and remain open to relocation to meet the dynamic demands of the IT industry and advance my professional career.
